

Planet Earth

Spindle Point Primary School — Geography Knowledge Organiser: Year 2 Autumn

We live on planet **Earth**, which is a **sphere**.
It has 5 **oceans**, 2 **seas**, and 7 **continents**.

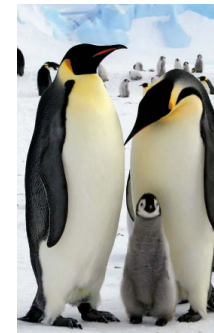

Weather is the change in the areas atmosphere .

Meteorologists predict the weather using satellites.

Antarctica is surrounded by the Southern Ocean. It is the most southern continent on the planet and in the southern hemisphere. Antarctica means 'opposite of Arctic'.

It is so cold no humans can live there; only animals like **emperor penguins**, fur seals and blue whales can survive the icy, cold weather.
